

WEBSITE DEVELOPMENT PROPOSAL

MAY 2025

INTRODUCTION.

PROJECT GOAL

Build a brand-new website that:

- Functions properly across all devices
- Is visually modern and warm, aligned with their faith-based mental health brand
- Includes a prominent landing page/button that directs users to their Kajabi platform, where they host courses and video tutorials
- Ensures improved email deliverability

WEBSITE ANALYSIS.

ISSUES & RECOMMENDATIONS

Problem	Solution
Broken Plugins	Rebuild site using a stable platform like WordPress with Elementor. Avoid third-party plugin overload.
Delayed Email Delivery	Switch email provider to a reliable transactional email service (e.g., Google Workspace, Zoho, or ProtonMail).
Spam Issues	Improve email content formatting, authenticate domain, and use an email marketing platform with Kajabi compatibility.
Outdated Visual Design	Use soft, warm color palette and modern UI/UX design principles described below. (See Design Plan)

DESIGN PLAN

Visual Style

- Colors:
 - Soft Blue #A7C7E7
 - Sage Green #A8C5A1
 - Lavender #D8B4E2
 - Light Beige or White background
- Typography:
 - Friendly sans-serif fonts like Poppins or Lato
 - Consistent headings (H1-H3) for clarity and accessibility

Layout

- Header: Logo, Navigation Bar (Home, About, Services, Contact, Kajabi Courses)
- Hero Section: Large calming background, tagline, and CTA button to Kajabi
- About Section: Faith-based mission statement + team bios
- Services Section: Icons + brief overviews
- Testimonials: Carousel or card grid with real stories
- Contact Section: Clean form, office hours, map
- Footer: Social links, quick links, email sign-up, copyright

DESIGN PLAN

Kajabi Integration

- Prominent CTA buttons (e.g., "Explore Our Courses") linking to Kajabi
- Embedded video teaser (if available) on homepage
- Optional: Banner with "Online Courses Available — Visit Our Kajabi Portal"

**WEB
PLATFORM.**

PLATFORM RECOMMENDATION

Suggestion: Wordpress + Elementor

Why WordPress + Elementor Is the Best Fit

1. Total Design Flexibility

- Elementor allows drag-and-drop page design without needing to code.
- You can build a visually custom experience that aligns with the brand's calming, faith-based aesthetic—unlike rigid templates in Wix or Squarespace.

2. Scalability & Control

- WordPress is highly scalable for future growth—adding blogs, directories, more services, or even donation features is easy.
- You're not locked in to a specific ecosystem like you would be with Squarespace or Wix.

3. Smooth Kajabi Integration

- Easily add CTA buttons, banners, and embed Kajabi links or videos using Elementor's design widgets.
- Keeps the focus on Kajabi content without making the website feel disjointed.

PLATFORM RECOMMENDATION

4. Optimized for Performance & SEO

- WordPress allows optimization tools (like Yoast SEO or Rank Math) that help you rank higher in search engines—important for attracting new clients.
- Performance plugins (e.g., WP Rocket) help the site load fast and work smoothly.

5. User-Friendly for the Client

- Elementor's visual editor makes it simple for the client to edit content, update text/images, or create blog posts without developer help.

6. Cost-Effective Long-Term

- WordPress itself is free, and Elementor has a free version with powerful features.
- You only pay for the hosting and any premium tools you choose (which are generally more powerful and affordable than platform-lock-in fees from Squarespace/Wix).
